

Quantify
Your Future

Renaissance Technologies

Renaissance

About Us

Renaissance Technologies, founded in 1982 by Dr. James Simons, is a quantitative investment management company trading in global financial markets, dedicated to producing exceptional returns for its investors by strictly adhering to mathematical and statistical methods.

Research & Programming Opportunities

Research and programming at Renaissance Technologies present a spectrum of attractive job opportunities for motivated individuals with the right quantitative and programming skills. Experience in finance is not required.

STATE OF THE ART
COMPUTATIONAL FACILITIES

MAIN CAMPUS
STONY BROOK, NY

**Scientific
Atmosphere**

The ideal candidate will have some of the following qualifications:

- A degree in mathematics, physics, computer science, statistics, or related disciplines
- A broad background or serious interest in applying quantitative methods to the analysis and solution of real-world problems
- Strong analytical and programming skills and an in-depth knowledge of software development
- Experience designing and developing high-performance, real-time, mission-critical systems

Stony Brook Community

Our campus is in a family-oriented community with excellent schools near the Long Island Sound, Stony Brook University, Brookhaven National Laboratory, and top medical facilities.

Renaissance is close to Long Island's famous beaches and only 75 minutes from Manhattan.
